† Percentage changes are over the previous period.

1) Based on seasonally adjusted series. Statistics Korea revises the historical data after publication of annual reports.

2) Annual figures refer to the end of period of original series.

3) The enterprises surveyed are altered every year. Based on current prices.

4) Yearly figure is the average of corresponding months.

5) Data up to 2010 are based on the 9th revised KSIC, and data from 2013 are based on the 10th revised KSIC.

6) Based on a four-quarter duration for last 12 weeks.

Time series from July 2000 to December 2017 was revised due to the retroactive change in estimated population based on the Register-Based Census in 2015.

7) Seasonally adjusted unemployment rates from June 1999 were adjusted because seasonal factors were recalculated to reflect data in 2021.

8) Average monthly earnings before tax. Data up to 2007 cover regular employees in manufacturing, and data from 2008 cover total(regular and temporary) employees in total industry. Data up to 2010 cover the enterprises with 5 or more regular employees, and data from 2011 cover the enterprises with 1 or more regular employees.

Data up to 2007 are based on the 8th revised KSIC, data for 2008-2019 are based on the 9th revised KSIC, and data from 2020 are based on the 10th revised KSIC.

9) Mining and manufacturing(including electricity, gas & water supply) sector labor productivity index (per hour). Time series from 2011 was revised due to application of the 10th revised KSIC and numerical correction in the Labor Force Survey data from 2018. Removed the previous data not based on the reference year 2015.
